PAST PLACEMENT BY OUR RECRUITING PARTNER

Senior software engineer

10+ years in tech

Full-stack engineer who builds AI-assisted data products and runs cloud infrastructure. Has worked remotely for US teams.

> A real person our recruiting partner has placed. Details are generalised to reduce identification risk, and availability isn't confirmed. We'll find people like them for your role.

HIGHLIGHTS

- Built a B2B product from scratch in Rails and React, with live updates.
- Built an AI matching pipeline on vector search that made matching much faster.
- Took slow API endpoints down to sub-second responses by fixing queries and indexes.
- Built and ran cloud infrastructure, as code, for a large consumer application.

SKILLS

Ruby on Rails · React · Go · TypeScript · Python · PostgreSQL · Vector search · AWS · LLM extraction · Infrastructure as code

EDUCATION

Master's in Computer Science
